

Chapter 1. The heart.

The heart is a muscular organ that pumps blood.

Chapter 2. The cardiac cycle.

Systole is the phase of contraction of the ventricles,
which ejects blood into the aorta and pulmonary trunk.

Diastole is the phase of relaxation and filling.

The first heart sound is caused by closure of the AV valves.

Chapter 3. Coronary circulation.

The left coronary artery arises from the left aortic sinus.

It divides into the anterior interventricular and circumflex branches.
